

DISINFECTION MATTERS

A Game-Changing Angle for Disinfection

Disinfection is now more important than ever. A safe and sterile environment is not just for hospitals anymore. Keep your environment clean and employees safe with UVC disinfecting!

WHAT IS UVC DISINFECTION?

- » An added layer of protection that kills pathogens
- » Eliminates any missed areas from manual cleaning
- » It's an enhanced safeguard. Clean prior to disinfecting.

WHY UVC DISINFECTION MATTERS

- » Miss the buzz of the office? Bring your work culture back to life by bringing your team back to the office.
- » Your organization needs disinfection to keep employees healthy and safe.
- » Disinfecting with UVC will instill a sense of safety and security for your employees and guests.

HOW UVC DISINFECTION WORKS

UV-C LIGHT KILLS
99.97% OF
BACTERIA & VIRUSES

1 Bacteria, viruses, and allergens are found on surfaces.

2 UV-C light breaks apart their DNA.

3 Pathogens are neutralized, surfaces are disinfected!

SAFE • CHEMICAL-FREE • FAST • PORTABLE • EFFECTIVE
